

What is claimed is:

1. A facsimile apparatus, comprising:

a radio unit communicating with a terminal apparatus which can receive one of an electronic mail data and the Internet data;

5 a display unit displaying a first portion of one of said electronic mail data and the Internet data received by said radio unit from said terminal apparatus; and

10 a print unit printing a second portion other than said first portion of said one of said electronic mail data and the Internet data received by said radio unit from said terminal apparatus, wherein said second portion is not displayed by said display unit.

2. The facsimile apparatus according to Claim 1, further comprising:

a register unit registering said terminal apparatus; and

5 a storing unit storing said one of said electronic mail data and the Internet data received by said radio unit from said terminal apparatus, and

10 wherein said storing unit stores said one of said electronic mail data and the Internet data received by said radio unit from said terminal apparatus registered in said register unit, and does not store said one of said electronic mail data and

TELETYPE

the Internet data received by said radio unit from
said terminal apparatus which is not registered in
15 said register unit.

3. The facsimile apparatus according to Claim 2,
wherein said register unit registers a plurality of
said terminal apparatuses, and

wherein said storing unit stores said one of
5 said electronic mail data and the Internet data
received by said radio unit from one of said plurality
of said terminal apparatuses registered in said
register unit, and does not store said one of said
electronic mail data and the Internet data received by
10 said radio unit from one of said plurality of said
terminal apparatuses which are not registered in said
register unit.

4. The facsimile apparatus according to Claim 1,
wherein said display unit displays a plurality of
tiles of said one of said electronic mail data and the
Internet data received by said radio unit from said
5 terminal apparatus, and

wherein said print unit prints one of said
electronic mail data and the Internet data
corresponding to a selected one of said plurality of
titles displayed in said display unit.

TELETYPE

5. The facsimile apparatus according to Claim 1,
further comprising:

a register unit registering a plurality of said
terminal apparatuses; and

5 a storing unit storing said one of said
electronic mail data and the Internet data received by
said radio unit from said plurality of said terminal
apparatuses, and

10 wherein said display unit shows which one of
said plurality of said terminal apparatuses registered
in said register unit outputs each of said one of said
electronic mail data and the Internet data stored by
said storing unit.

6. The facsimile apparatus according to Claim 5,
wherein said print unit prints said one of said
electronic mail data and the Internet data received
from one of said plurality of said terminal
5 apparatuses selected with reference to said display
unit.

7. The facsimile apparatus according to Claim 1,
wherein said one of said electronic mail data and the
Internet data received by said radio unit from said
terminal apparatus is divided into said first and
5 second portions based on the data amount of said one.

2025 RELEASED

8. The facsimile apparatus according to Claim 1,
wherein said one of said electronic mail data and the
Internet data received by said radio unit from said
terminal apparatus is divided into said first and
5 second portions based on the kind of the data of said
one.

9. The facsimile apparatus according to Claim 1,
wherein said radio unit communicates with said
terminal apparatus wirelessly with the Bluetooth
standard.

10. The facsimile apparatus according to Claim 1,
wherein said radio unit communicates with said
terminal apparatus wirelessly with the PIAFS (PHS
Internet Access Forum Standard).

11. The facsimile apparatus according to Claim 1,
wherein the Internet data is the HTML data.

12. The facsimile apparatus according to Claim 1,
wherein said first portion corresponds to a portion
which can be displayed by said terminal apparatus, of
said one of said electronic mail data and the Internet
5 data received by said terminal apparatus, and said
second portion corresponds to a portion which can not
be displayed by said terminal apparatus, of said one

TELETYPE

of said electronic mail data and the Internet data received by said terminal apparatus.

13. The facsimile apparatus according to Claim 1, wherein said first portion corresponds to data of a Web site complied with the Internet connection service for a portable telephone including the i-mode.

14. The facsimile apparatus according to Claim 1, wherein said first portion corresponds to a portion other than an attachment file data of an electronic mail data.

15. The facsimile apparatus according to Claim 7, wherein a value of the data amount of said one is adjusted by a user of said facsimile apparatus.

16. A communication system, comprising:

a facsimile apparatus; and

a terminal apparatus, and

wherein said terminal apparatus includes:

5 a data receive unit receiving one of an electronic mail data and the Internet data;

a display unit displaying a first portion of said received one of said electronic mail data and the Internet data; and

10 a data transfer unit transferring at least a

TELETYPE

portion of said received one of said electronic mail data and the Internet data, and

wherein said facsimile apparatus includes:

15 a radio unit receiving said at least portion transferred by said data transfer unit;

a display unit displaying a second portion of said at least portion received by said radio unit; and

20 a print unit printing a third portion other than said second portion of said at least portion received by said radio unit, wherein said third portion is not displayed by said display unit.

17. The communication system according to Claim 16, wherein said first portion is substantially identical to said second portion.

18. The communication system according to Claim 16, wherein said facsimile apparatus further includes:

a register unit registering said terminal apparatus; and

5 a storing unit storing said one of said electronic mail data and the Internet data received by said radio unit from said terminal apparatus, and

10 wherein said storing unit stores said one of said electronic mail data and the Internet data received by said radio unit from said terminal apparatus registered in said register unit, and does

FOR FILING

not store said one of said electronic mail data and
the Internet data received by said radio unit from
said terminal apparatus which is not registered in
15 said register unit.

19. The communication system according to Claim 16,
wherein said display unit displays a plurality of
tiles of said one of said electronic mail data and the
Internet data received by said radio unit from said
5 terminal apparatus, and

wherein said print unit prints one of said
electronic mail data and the Internet data
corresponding to a selected one of said plurality of
titles displayed in said display unit.

20. The communication system according to Claim 16,
wherein said facsimile apparatus further includes:

a register unit registering a plurality of said
terminal apparatuses; and

5 a storing unit storing said one of said
electronic mail data and the Internet data received by
said radio unit from said plurality of said terminal
apparatuses, and

wherein said display unit shows which one of
10 said plurality of said terminal apparatuses registered
in said register unit outputs each of said one of said
electronic mail data and the Internet data stored by
